MTP10-B6F55

The MTP10-B6F55 infrared thermopile temperature sensor is a non-contact temperature sensor with a temperature measurement field of view of up to 83°. It has a built-in MEMS thermopile chip and adopts the 8~14μm bandpass filter exclusively customized by MFrontier. The average transmittance is $\geq 75\%$. It has the characteristics of high-precision NTC and can be widely used in a variety of temperature measurement fields.

MEMS thermopile chip

TO-46 package

High sensitivity

High precision NTC

5.5~14μm long pass filter

Product parameters

Model	MTP10-B6F55
Package form	TO-46
Field of view (50% maximum signal)	83°
Transmitted wavelength range	5.5~14μm; long pass
Average transmittance	$\geq 75\%$
Working temperature	-30~100°C
Storage temperature	-40~125°C
